WHAT'S NEW

DEFENDER

The all new Defender is designed to take your performance to the next level boasting a wide field of vision, soft polymers and superior optics. Inspired from our racing heritage, the Defender features today's state-of-the-art eyewear technologies such as the Power Flow ventilation system as well as our proprietary soft Safety Bumpers and ensures superior visual comfort mounting ImpactX revolutionary photochromic lenses or vibrant RP Optics Multilaser ones

RYDON (The Restyling)

It has been 15 years since Rydon disrupted the sports eyewear world. We have re-engineered our award winning design cult piece to deliver unsurpassed performance. Interchangeable lenses, endless prescription and custom options, new temple tips and fully adjustable nosepiece: Rydon boasts enhanced fit factors and astounding details. A timeless icon that continues to represent a compelling combination of performance, versatility, comfort and style.

RYDON SLIM

The new Rydon platform is now available in the slim size to provide all the comfort, technology and versatility of our iconic model to athletes and weekend warriors with more slender faces.

SPECTRUM

Shaped for performance, the all new Spectrum is designed to outclass the road helmets standards of comfort, protection and weight. The Spectrum revolutionary dynamic design features a seamless integration of three In Mold EPS liners knitted together. This unique structure boost ventilation while keeping this race machine extremely lightweight and comfortable.

VOLANTIS

The newly developed Volantis blends aerodynamic performance and functionality. Thanks to its smooth, spherical design, the Volantis is ideal for sprint trials, shorter distance triathlons, and cycling. The new addition to Rudy Project's award-winning aero helmet line up features the most advanced Rudy Project technologies such as an internal airframe, the new RSR 10 retention system, and an integrated, removable optical shield.

SPINAIR 56

SPINAIR 57

SPINAIR 58

SPINAIR 56 | 57 | 58

The Spinair represents a new milestone in Rudy Project's company history – the Active Lifestyle philosophy. Available in 3 different shapes and reminiscent of current eyewear trends, the Spinair blends lifestyle design with Rudy Project's iconic performance features such as interchangeable lenses, adjustable temple tips, and soft rubber nose pads for an active fit.

SPINHAWK LOUD

Spinhawk loud, the lifestyle sunglasses of the athletes with bright colors and vibrant logo is now available for all the brand lovers.

GOGGLE OPTICAL INSERT

The all new Goggle Optical Insert allows prescription wearers to benefit from the unsurpassed eye protection and the wide field of view of all our Snow, Mountain Bike and Motocross goggles. The insert is compatible with all the Rudy Project goggles

STRYM

Lightness and ventilation for your everyday adventures. Clean and compact, Strym features the inner airframe and 16 vents strategically placed to enhance the air circulation and keep you always cool when pedaling. Thanks to the all new RSR 10 retention system, Strym ensures a customized and comfortable fit to athletes and weekend warriors.

AIRSTORM MTB

We've fine tuned the Airstorm graphics with attractive texture and colors aligned with the most popular and current mtb trends. Airstorm comes out with the visor mounted to deliver more protection from sun and obstacles.

3 LENS TECHNOLOGIES: FACE ANY WEATHER CONDITION

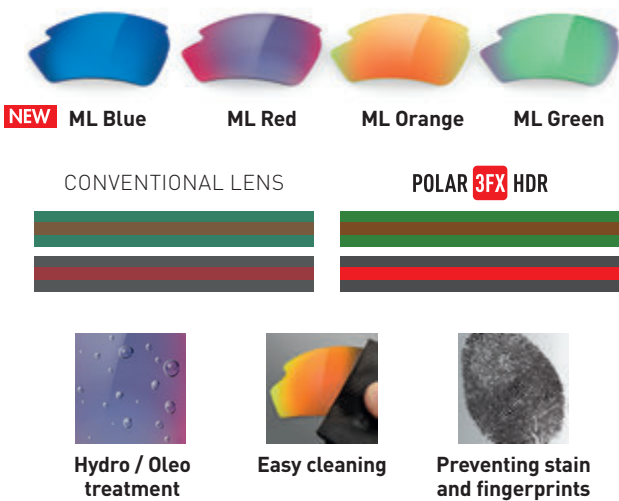

impactx[®] UNBREAKABLE PHOTOCROMIC OPTICS

ImpactX[®] lenses boast breakthrough photochromic semi-rigid molecular properties formulated exclusively for Rudy Project and represent today the most advanced technological solution in the field of vision protection. Thanks to their transparency and superior optical quality, lenses made in ImpactX[®] ensure sharp vision and unbeatable comfort.

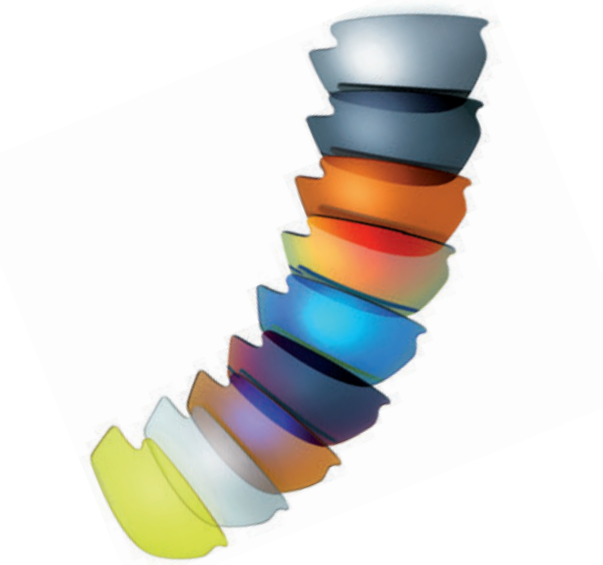

POLAR 3FX HDR

After years of intense research, we have updated our Polar3FX technology to take your vision to the next level. Polar3FX HDR technology eliminates glare providing superior visual comfort, enhanced contrast and contours. In addition, the new Polar3FX lenses incorporate the HDR (high dynamic range) filter to further define contrast and color perception. To ensure maximum toughness and durability, we have boosted the Polar 3FX lenses with the revolutionary 3FX Coating anti smudge and anti aging treatment.

RP OPTICS

RP Optics lenses protect against harmful UV rays up to 400 nm and offer a range of over 30 available colors. Ideal for athletes and weekend warriors who demand performance but accept no compromise when it comes to appearance, RP Optics are the industry benchmark in polycarbonate lenses thanks to their high impact resistance and the wide selection of coatings and colours available. Our R&D department carried out a set of scientific researches to design static lenses targeted to different uses.

GUARANTEED
UNBREAKABLE FOR LIFE

ImpactX® lenses are guaranteed unbreakable for life. The molecular semi-rigid properties are developed exclusively for Rudy Project and ensure the physical protection of your eyes against impacts, chemical and atmospheric agents; but because they are semi-rigid they will also minimize injuries during impact of fall.

IMPACTX LENSES

CONVENTIONAL LENSES

Building on ImpactX® technology and after years of laboratory research and field tests with professional athletes, Rudy Project is today proud to introduce ImpactX® 2, a new array of technical lenses perfected with unparalleled cutting- edge photochromic particles, providing unique climatic management technology: getting dark from low to high light transmission within few seconds and tailored to reach a custom color from an initial clear state, ImpactX® 2 lenses will enhance contrast , even in darker conditions, they will improve visual acuity and depth perception while providing unparalleled eye protection.

LIGHTWEIGHT

ImpactX® lenses are 16% lighter than CR-39 and 10% lighter than polycarbonate; they have lower internal stress and chromatic dispersion than polycarbonate, resulting in sharper images, higher definition, reduces “rainbowing”, and more visual comfort. The program offers cutting-edge photochromic and polarized technology for unparalleled weather management.

**PHOTOCROMIC
TECHNOLOGY**

Unlike most photochromic standard lenses, ImpactX® lenses are fused in the mass of the polymer itself with a complex manufacturing process, making it more resistant and clearly optically superior to most competitors.

**EXCLUSIVE SEMI-RIGID
PLATFORM**

ImpactX® is a family of patented polyurethane optical polymers, transparent and unbreakable, originally developed for military and aerospace requirements to provide bullet-proof, transparent, and light-weight material capable of providing superior protection, reliability and longer lasting performance than polycarbonate.

RUDY PROJECT TECHNOLOGY | POLAR 3FX HDR NEW

Experience the true colors. Our POLAR 3FX technology protects your eyes from harmful UV rays and eliminates glare by selectively filtering non harmful wavelengths through the lens. POLAR 3FX technology is designed to filter glare from car headlights, sun rays and the refracted light on wet or shiny surfaces like water and snow. Plus, the all new POLAR 3FX lenses features the HDR filter which is fine tuned to maximize your safety by improving contrast in urban, mountain and road bike environments. The result is bright and comfortable vision, sharper details perception and brighter colors with considerable reduction in eye fatigue. The POLAR 3FX Multilaser lenses are available in a vast array of colors allowing to benefit from they superior visual comfort and to choose the color which best suits for your style.

* not available with HDR technology

HDR TECHNOLOGY

The HDR filter is designed to boost your color experience by tuning the wavelength of the light passing through the lens. By actively re-fining the intensity of various wavelengths of light and by optimizing the visible, the HDR filter provides extraordinary visual performance. In addition to a maximized chromatic range, benefits include superior perception, sharper image and unparalleled contrast definition.

3FX BENEFITS

This state-of-the-art coating has been developed to make Polar3FX lenses tougher and more durable. The 3FX coating is a hydrophobic barrier which minimizes the formation of smudges. This treatment is designed to enable water slipping on the surface, to prevent stains and fingerprints and to make cleaning easier.

RUDY PROJECT TECHNOLOGY RP OPTICS

LEARN MORE
WATCH THE VIDEO

For particular light conditions, Rudy Project offers technically advanced specialty lenses with high visual quality tailored to your needs. The various lenses enable you to perform and excel in any light or atmospheric condition you may encounter. RP Optics is a design philosophy that aims to improve visual performance and eye protection by means of selective lenses with high optical and mechanical performance, combined with the most advanced technologies and scientific applications. Our lens program has features common to every type of lens, such as neutralizing ultraviolet radiation completely up to 400 nm (UV 400 Protection), and maintains colors integrity even with the dark filters. We believe it is not enough to protect the eyes from hazardous radiation and external agents. It also important to enhance visual acuity and minimize distortion, while offering high quality optics suitable for sports. In some extreme conditions an athlete must rely on technologies to enhance performance and minimize distractions. For this reason, we have expanded the range of filters with specific treatments including antifog, hydrophobic, and photochromic technology.

Always at the forefront of technology, our lenses guarantee visual acuity and physical protection of the eye. High visual quality lenses have the following properties/benefits:

- REDUCE GLARE - ENHANCE CONTRAST
- PROTECT FROM ULTRAVIOLET RAYS
- ENSURE TRUE VISION WITHOUT DISTORTION OF COLORS
- PROTECT AGAINST EXTERNAL AGENTS.

TECHNOLOGY

LEARN MORE
WATCH THE VIDEO

360° FULLY ADJUSTABLE [1]

The 360° Fully adjustable Tips can be adapted in any direction by applying light pressure and thanks to an innovative system - the T-Lock - they can be replaced or changed to create a completely customised fit and perfect grip. Adjustable nose-pieces are outstandingly comfortable and offer an exceptional fit for any shape of face: the Ergonose System which can also be used to adjust the glasses' height and their distance from the face to prevent misting.

VENT CONTROLLER [2]

No more fog, crystal clear vision: our patented Vent Controller is a simple yet practical innovation allowing air flow control coming from the lens intake to reduce thermal shock to prevent fogging, ensure perfect vision and comfortable ventilation. It can be locked easily, closing airflows in a snap.

QUICK CHANGE INTERCHANGEABLE SYSTEM [4]

The system of interchangeable lenses called Quick Change allows you to easily and swiftly change out lenses to manage any light condition and visual comfort. Rudy Projects offers superior optical solutions for weather management.

TOTAL COMFORT [3]

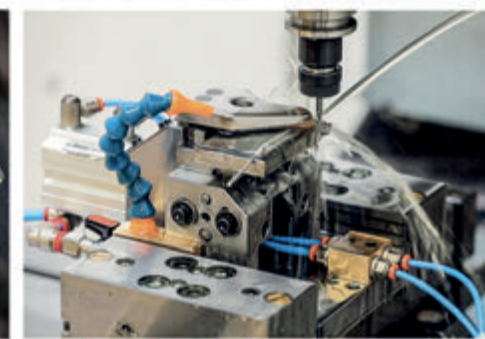

All our sunglasses are entirely conceived to offer an unparalleled comfort and a perfect fit. Designed by biometric engineers, tested by professional athletes, most of our products incorporate phenomenal comfort solution, complete adjustability and full customization. Our products perfectly fit the physical features of each ethnic group.

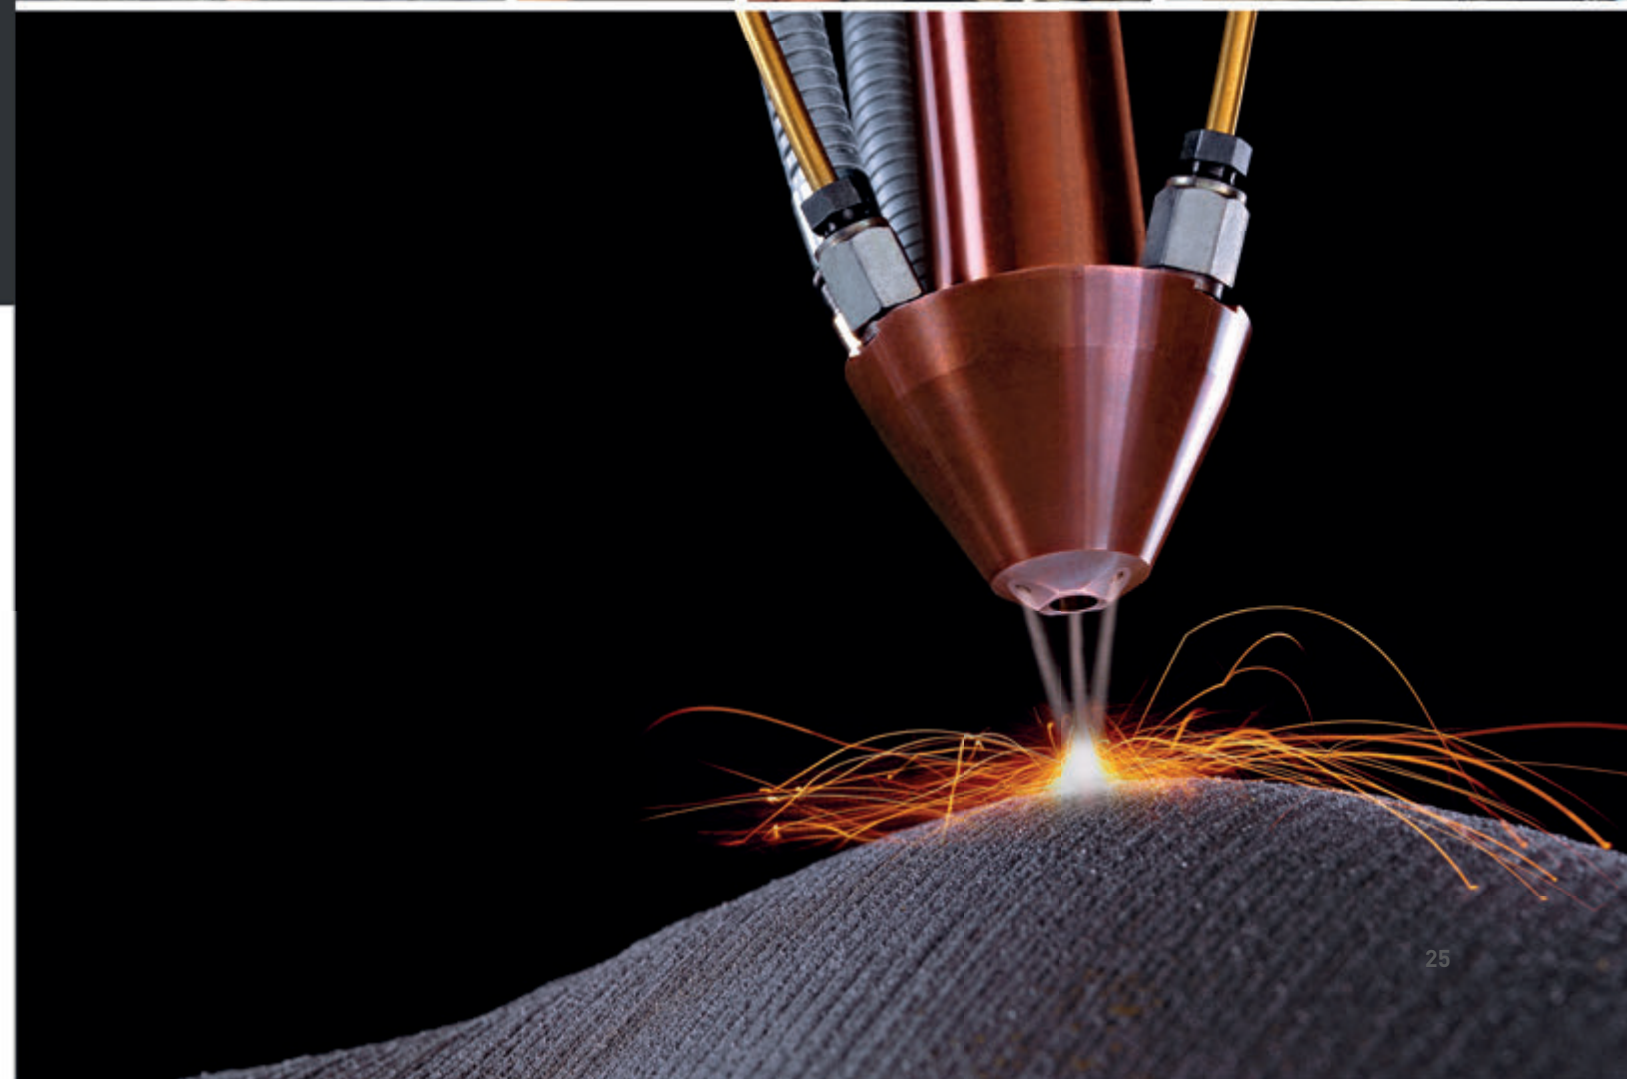

RESEARCH AND DEVELOPMENT

Technology and advanced science are the heart of Rudy Project. Since 1985 all Rudy Project products masterfully blend cutting-edge technology and aesthetically sculpted design, along with Italian styling and attention to detail, to make some of the world's best eyewear, hi-tech prescription solutions, helmets and sports gear. Our craftsmen use the highest quality materials and manufacturing techniques to create lightweight, comfortable and extremely functional eyewear.

Innovation, research, technology, safety and style are the core concepts of our products' revolutionary design. Dynamic and attractive lines make our collection unique, stylish and avant-garde, a clear result of constant innovation and Italian manufacturing, something that we care about. Our R&D team draws inspiration from Rudy champions and ambassadors to design revolutionary eyewear and helmets to enrich our collections year by year and to meet athletes and sports enthusiasts' different demands.

BIKE & RUNNING

ELEVATE YOUR PERFORMANCE

SAFETY, FIRST OF ALL

All the Rudy Project sunglasses provide superior safety through integrated hinges and soft, yet tough, materials to prevent injuries in the event of falls. To increase your protection, we have created the bumpers, removable rubber inserts placed at the bottom of the lens which cushions your face from knocks. The bumpers are available in different colors, what a better opportunity to combine safety and style.

WIDE FIELD OF VISION

Protection from atmospheric elements, unrestricted line of sight and extreme comfort are crucial to keep the focus on your performance. The shape of the Rudy Project lenses is designed to ensure an unobstructed field of vision. Starting from the feedback of our pro-athletes, we realize lenses that offers more depth and coverage. The shape of the lenses enhances your eye protection while expanding your field of vision during rides and runs.

MANAGE LIGHT

All the Rudy Project sunglasses features easy-to-change lenses to manage effectively every weather condition. This system allows to replace without hassle the lenses according to your demands, offering at the same time the possibility to create your unique customized model.

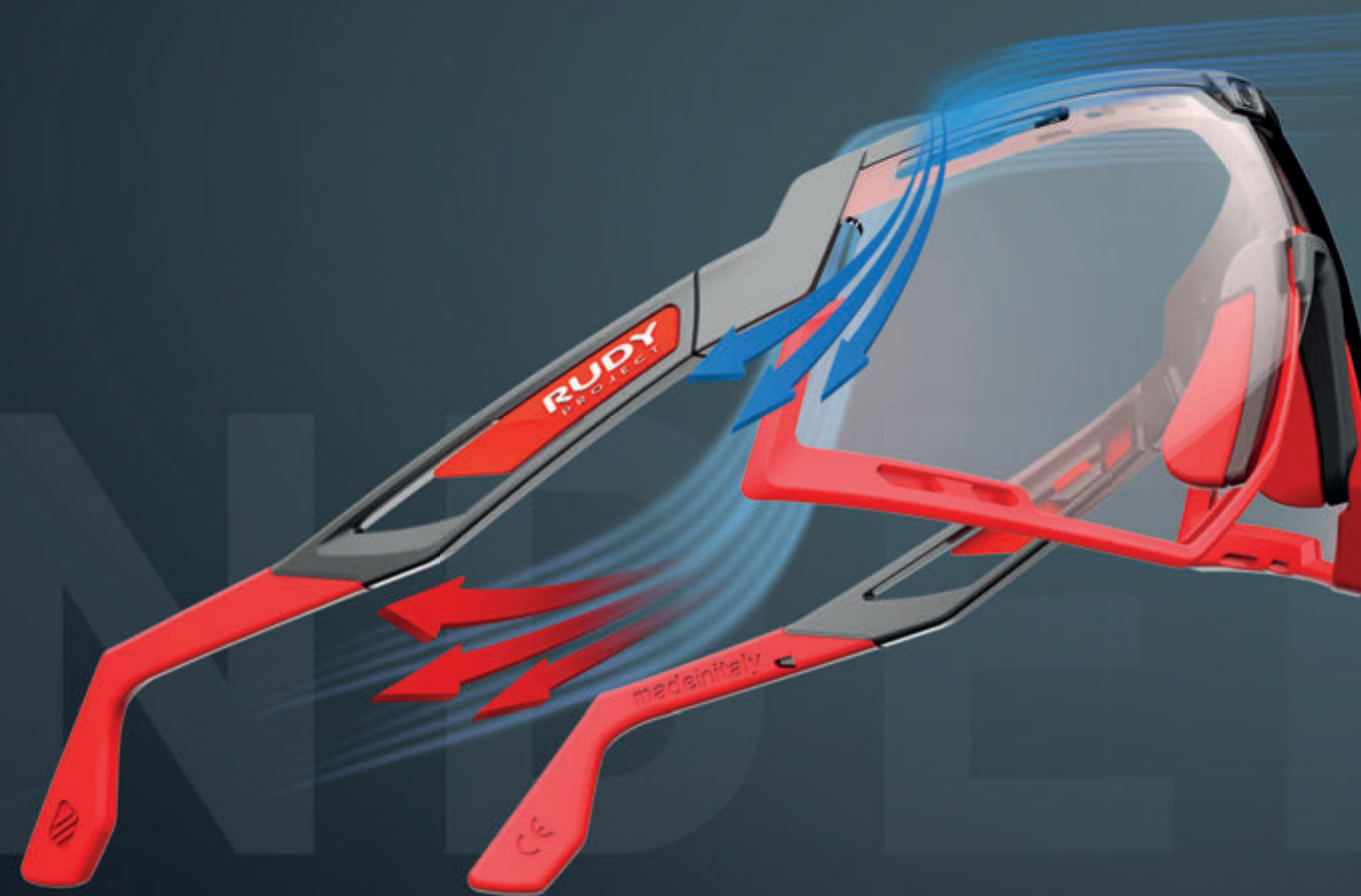

FOCUS ON DEFENDER

1992 AGRESSOR

2019 DEFENDER

INSPIRED FROM THE PAST, A MILE STONE FOR THE FUTURE

Inspired from more than 30 years of Rudy Project iconic heritage, the Defender blends an innate racing attitude with the most advanced eyewear technology to provide unparalleled comfort to athletes and weekend warriors. Adjustable nosepad and temple-tips, ultra-deep field of vision, protective soft Safety Bumpers and extraordinary Power Flow ventilation System make the Defender extremely comfortable and safe. The Defender features Rudy Project's most advanced lens solutions such as ImpactX unbreakable photochromic lenses or the vibrant Multilaser RP Optics.

All of this, combined with the distinctive Rudy Project unique design, make Defender the outstanding newcomer on the bike eyewear scene..

EXTRAORDINARY ULTRALIGHT COMFORT

Loaded with Rudy Project core features, the Defender incorporates fully adjustable temple tips specifically designed to fit helmets perfectly, and integrated adjustable soft polymer nose pads for a superior high-grip ergonomic setting

BUMPERS TECHNOLOGY

The Defender shield lens integrates our innovative Bumper technology: soft polymer inserts bring superior protection by cushioning and protecting lens edges from your face, exceptionally functional in case of shock or fall. Available in different colours, the bumpers offer also the opportunity to create a unique custom look.

RX-ABLE

Thanks to its proprietary removable Optical Insert, athletes and weekend warriors with prescription needs can benefit from the comfort and the wide field of vision of the Defender. Easy-in, easy-out, perfect for contact lenses wearers, we call it On-demand RX-ability.

POWERFLOW VENTILATION SYSTEM

The Defender ensures unparalleled heat dissipation thanks to the innovative PowerFlow system: vents have been scientifically placed on the temple tips, on the front chassis and on the lens to enhance air circulation while ensuring maximum aerodynamic efficiency and without disturbing vision.

UNSURPASSED FIELD OF VISION

Designed for the most demanding cyclists, Defender boasts a shield lens that ensure wide peripheral and deep horizon visibility, available in a wide array of options, including our awards winning and revolutionary ImpactX optics technology.

GRAPHENE COMPOUND

We have developed an exclusive collection of leading products using a special compound of the world's most revolutionary material: GRAPHENE.

Lighter than carbon but stiffer than diamond, Graphene boasts unique multifunctional molecular properties: ultra resistance, anti-scratch superiority and exceptional stability while achieving a superb semi-polished deep grey finish naturally obtained during injection moulding. No paint is needed, irregularities and patterns in the mass are proof of the unique process, making every single piece one of a kind.

HELMETS

ELEVATE YOUR PERFORMANCE

PHENOMENAL AERODYNAMIC PERFORMANCE

Countless hours in the wind tunnel with aerodynamic experts and professional athletes, form factor and data analysis with engineers and experienced designers, we develop revolutionary helmets which ensure superior aerodynamic performances lowering aero drag. Dorsal ridge, air directional flow, and adaptable vent covers are some of the feature designed to deliver unsurpassed aerodynamic performance.

TOTAL SAFETY

Our mission is to elevate athletes security and performance. Our commitment to protection is represented by the thousands of hours of crash testing and constant research on the most advanced technology to offer the highest degree of safety. Featuring EPS In-mold structure, multiple shells construction, quality materials and cutting edge solutions such as Hexo Crush and MIPS, the Rudy Project helmets guarantee safety and reliability dissipating the energy of shocks and impacts.

COMFORT AND VENTILATION

Weight, fit and heat management are crucial to ease the athletes strain and enhance your comfort. The integrated airframe, Vortex Killer System, internal air channels, shape and positioning of external vents are minutely designed to keep your head cool and dry enhancing the helmet internal ventilation. We constantly fine tune the helmet retention system to always ensure a comfortable and wrap-around fitting.

AERO HELMETS | TECHNOLOGY

Phenomenal performance, innovative technological concepts, breathtaking aerodynamics and distinctive design language redefine the pinnacle of the aero helmets segment.

REMOVABLE OPTICAL SHIELD

The fully integrated and removable front shield will ensure maximized protection and enhanced aerodynamics while eliminating annoying glare and eye fatigue. Bulding on RP Optics advanced lens technology, the polycarbonate visor combines cutting edge coatings ensuring protection against UV rays and minimizing eye strain allowing athletes to stay focused only on their performance. That's why all our aero helmets features a removable optical shields.

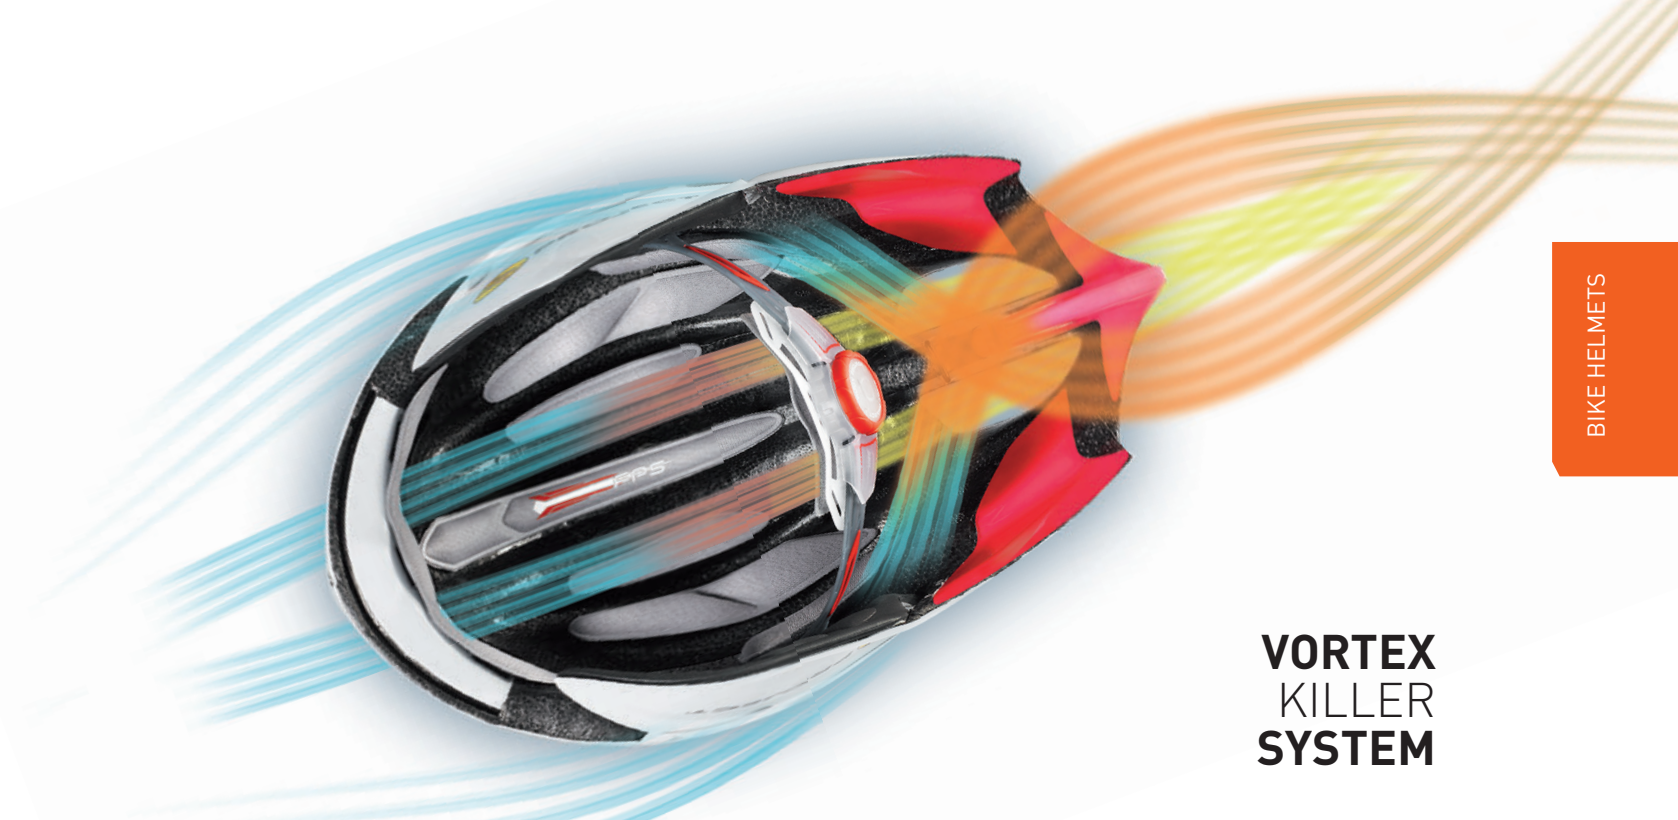

UNIVERSAL DORSAL RIDGE

Inspired by sharks, the dorsal ridge helps converting sideways force into a forward force, like it was a long tailed helmet. It gives more surface only when it is necessary, as with a cross wind, while it remains small for less frontal area effect.

DYNAMIC PRESSURE POINTS

Using parts of the patented Vortex Killer System, there are specific high radius lower edges along the bottom of the helmetS. This links to the rear section which has new side scoops with specific NACA duct shaping, Boost 01 and Boost Pro are able to pull air around riders neck and off the shoulders for improved aerodynamics.

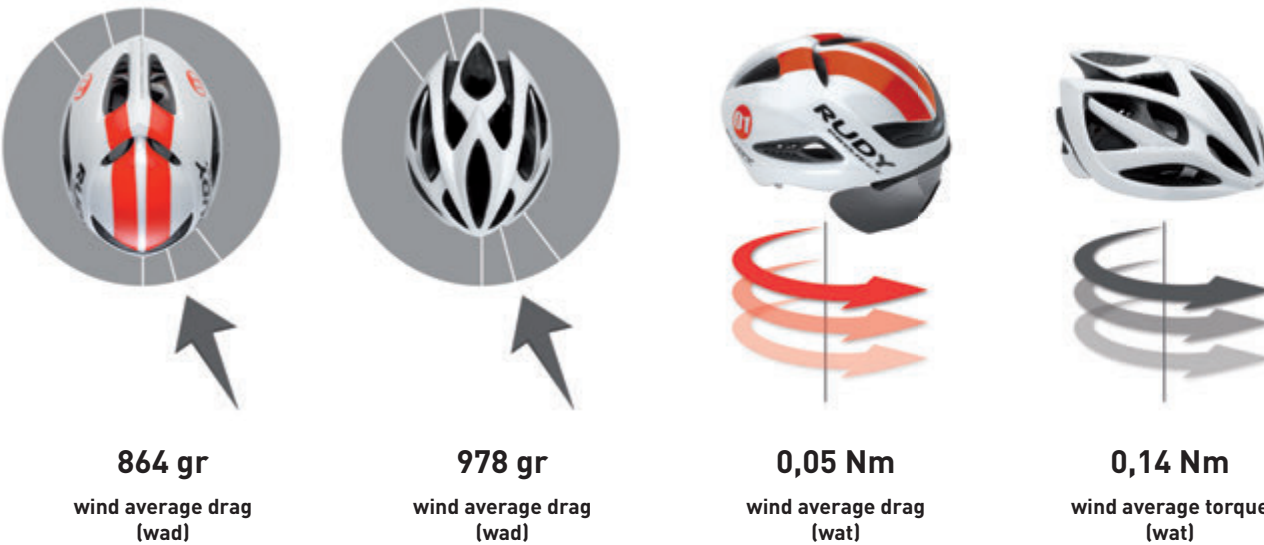

VORTEX KILLER SYSTEM

The Vortex Killer System is designed to aid in the straightening of the airflow over the rear of the helmet. The scientific combination of the helmet geometry and the side vents helps in managing these vortex low pressure points which create drag and instability. Air is directed, through a proprietary channel system, over the neck and shoulder areas at a different rate or volume than the oncoming free air. The Air director creates a high/low pressure area, on each side, so that air coming from the right vent goes to the opposite side of the Director and then flows out. And vice versa for the other side. Acceleration of air means more ventilation to help with sweat evaporation.

ZERO TORQUE

The directional torque is the natural reaction of a wing shape to self-align with the outside wind forces and it is the main cause of discomfort on riders neck especially over long distance races. The Boost 01, for example, offers more than a 12% aero drag reduction compared to a traditional road helmet along with a 65% reduction in neck torque.

(Thanks to the constant feedback of professional athletes in both road and triathlon bike, countless hours in the wind tunnel, form factors and data analysis with experienced designers and engineers, we developed revolutionary helmets leading us to virtually dominate the Lava Magazine helmet count at the Ironman World Championship Kailua-Kona Hawaii seven years in a roll)

AERO HELMETS | TECHNOLOGY

With 50 years of formula 1 experience, swiss side has revolutionized the cycling industry with unmatched aerodynamic and engineering knowledge. Swiss Side conducted the enclosed wind tunnel study to prove the performance of the entire Rudy Project helmet collection. Swiss Side was not involved in the preliminary development of the helmet line.flows in a snap.

WIND TUNNEL TESTING SESSION

This report shows a private wind tunnel session directed by Swiss Side, the number one company in aerodynamics, to collect scientific data on the performance of the Rudy Project aero helmets. All measurements were made with two different riders and one dummy in different setups to simulate realistic body and head positions. All tests made with the static truncated dummy (with cut off lower arms and lower legs) were made in order to obtain a repeatable and accurate measurement of helmet performance. For time trial / triathlon helmets, the dummy body position was set to a typical flat position with the head measured in up to 2 different angles relative to the road - 45° (standard head position),and 60° (low head position). The wind tunnel results showed a consistent correlation between the two different experiments demonstrating the applicability of the data for other riders. All measurements were made at 45km/h over a full yaw (cross-wind) range of -20° to +20°. The swiss side weighting system for 'triathletes' is applied to the results measured at all angles over the yaw range, to calculate one aero drag performance number in watts for each helmet. This is referred to as 'merit' aero p (w) in the data tables.

HELMET LINEUP RANKING

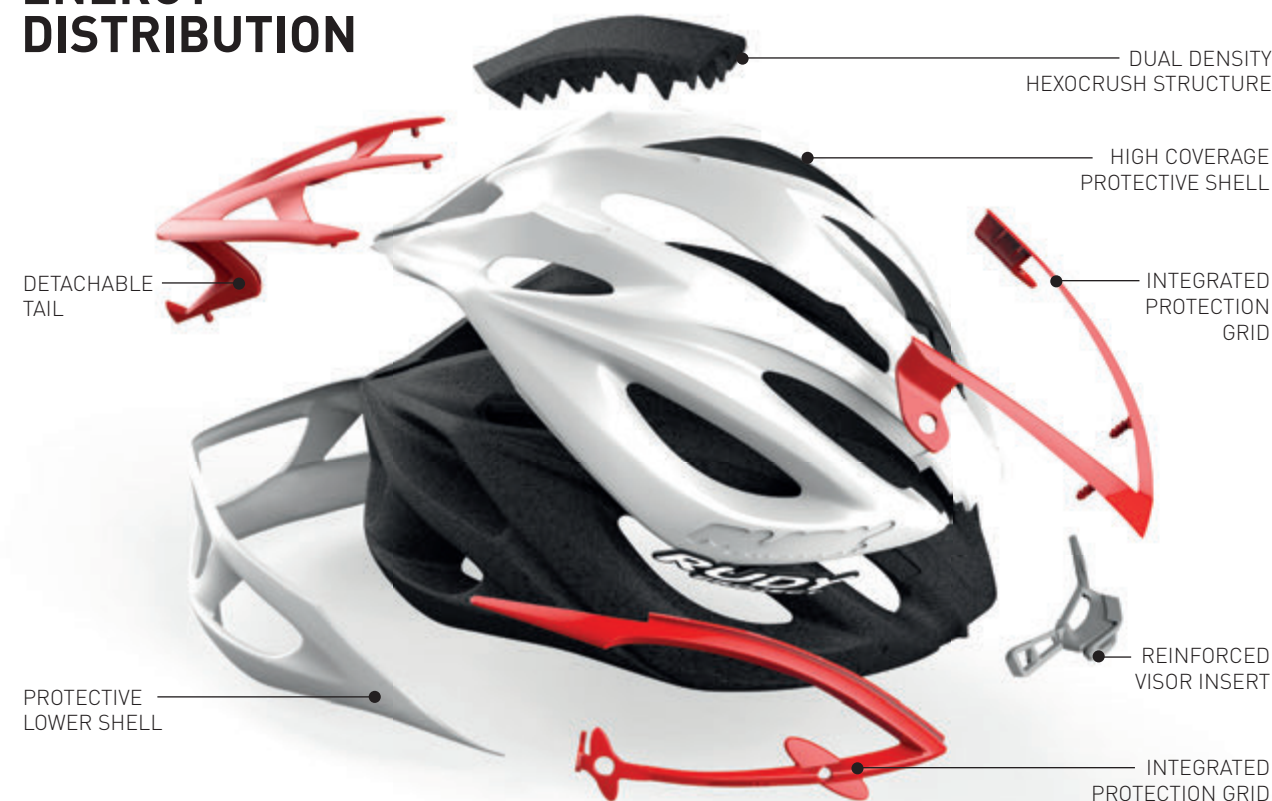

#	HELMET MODEL (RANKING)	TIME SAVED 70.3 (SECONDS)	TIME SAVED 70.3 (@ 45 KM/H)	TIME FULL DISTANCE (@ 45 KM/H)	WATTS SAVED FULL DISTANCE (@ 45 KM/H)	WEIGHT (S/M SIZE)	INTERNAL VENTILATION
1	WING 57 - VENTS OPEN	72"	8W	144"	8W	320g.	●●○○○
2	BOOST PRO - VENTS OPEN	63"	7,3W	126"	7,3W	300g.	●●●●○
3	BOOST ONE - VENTS CLOSED	46"	5,2W	92"	5,2W	280g.	●●●○○
4	BOOST ONE - VENTS OPEN	32"	3,7W	64"	3,7W	280g.	●●●●○
5	VOLANTIS AERO-ROAD HELMET	0"	0W	0"	0W	270g.	●●●○○

- NO CONSIDERABLE DIFFERENCE WAS NOTICED WITH USE OF SUNGLASSES VERSUS INTEGRATED VISOR
- OPEN VENT HELMET CONFIGURATIONS WERE PROVEN TO BE THE FASTEST.
- TIME SAVINGS ARE CALCULATED USING AN AVERAGE MAN WEIGHING 75KG., RIDING 8KG BIKE, PRODUCING 200 WATTS ON A 70.3 DISTANCE WITH 500 M CLIMBING.

TOTAL SAFETY | TECHNOLOGY

Falls can prove to be very costly and have permanent consequences. The starting point for the development of Rudy Project's helmets is the adoption of excellent quality materials which guarantee safety and reliability.

SAFETY AND ENERGY DISTRIBUTION

Rudy Project undertakes to use only highly-advanced materials which can absorb shocks and dissipate the mechanical energy without it being transferred to the head and body. The structure of our helmets combines expanded polystyrene (EPS), a material which can disperse the force caused by an impact through a plastic deformation and polycarbonate shell for increased durability and protection.

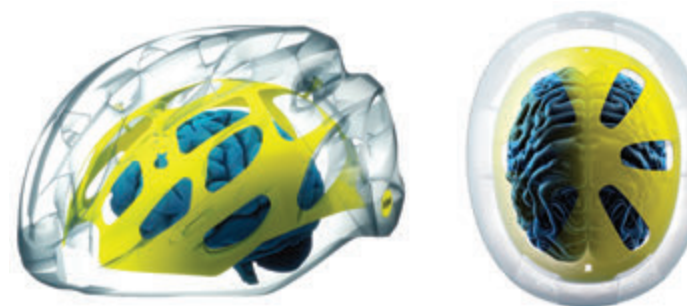

HIGH-VIZ COLORS

Riders safety is one of the main goal of Rudy Project. Helmets, sunglasses and our bikewear collection are designed to provide the highest standard of performance and safety. All our lines are manufactured with finest materials while bright and fluorescent colours ensure perfect visibility on the road enhancing riders security and drawing drivers' attention

MULTIPLE IN MOLD CONSTRUCTION

All the Rudy Project's helmets adopt excellent quality materials to guarantee safety and reliability. The structure of our helmets combines expanded polystyrene (EPS), a material which can disperse the force caused by an impact through a plastic deformation and polycarbonate shell for increased durability and protection. The Multiple shells construction enhance helmet stability and security with a seamless integration of interwoven shells.

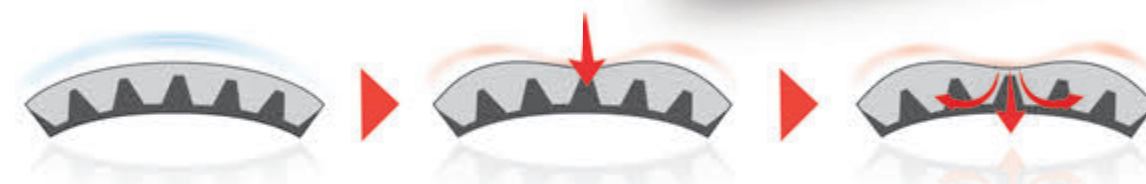

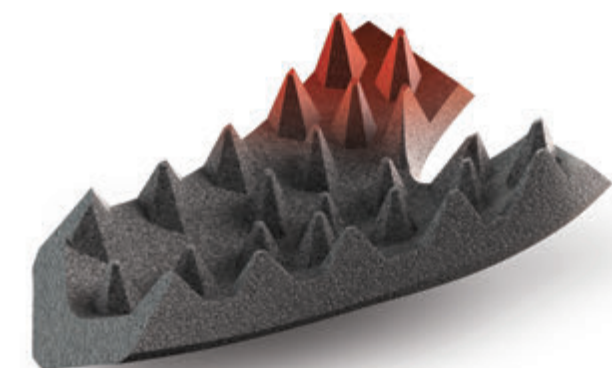

MIPS

Our helmets feature the MIPS mimics the brain's own protection system with a unique low-friction layer between the head and the helmet. MIPS is scientifically proven to reduce some of the energy from an angled impact.

HEXOCRUSH

Based on the Cone-Head technology, the Racemaster's Hexocrush is designed to maximize athletes safety by ensuring unprecedented levels of security. The line is molded with two different foam densities and the hexagon shaped structure provides improved shock absorption by dissipating impact forces sideways and radially.

When a shock occurs, the impact force is directed towards the head pushing the outer layer to compress. Simultaneously, the head presses in the opposite direction compressing the inner layer and the hexagons. In this way, energy is spread within the foam instead of towards the head and, thanks to the hexagons, the g-force pressure on the head is reduced.

COMFORT | TECHNOLOGY

Scientifically engineered for protection, our helmets are designed to deliver unsurpassed comfort enhancing ventilation, fit, sweat absorption and size adjustment.

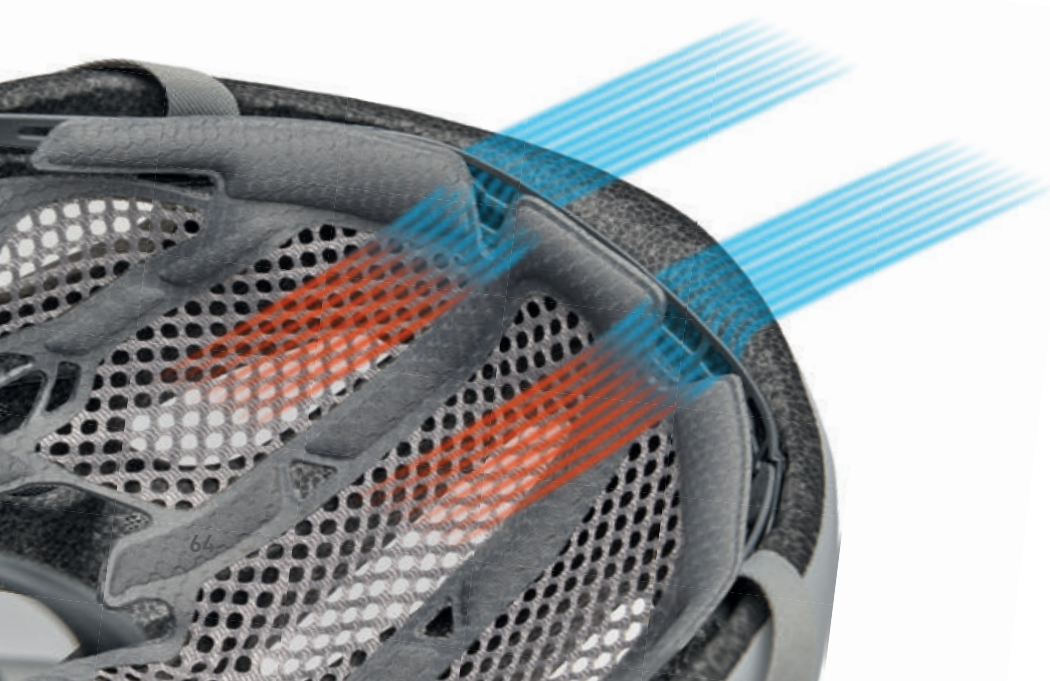

FLOW THROUGH VENTILATION SYSTEM

Keeping your head cool and dry is essential for maintaining performance at the highest levels. Thanks to the shape and the positioning of the external air openings and the unique air channels inside the cap, our helmets are perfectly ventilated and very comfortable. The air vents have been designed to permit maximum dispersion of heat, ensuring your performance does not drop as a result of the heat, and effective evaporation of sweat.

COMFORT INTERNAL PADDING

Rudy Project's helmet deliver extraordinary fit comfort. Most of our helmets are loaded with 2 interchangeable and washable pad-dings. The design position inside the shell has been scientifically studied to improve fit, ventilation and protection.

INTEGRATED AIRFRAME

The Airframe frontal padding is seamlessly integrated in the helmet retention system. Engineered to minimize the sweating process inside the helmet, the Airframe frontal padding enhances air circulation and sweat evaporation.

STRAP QUICK-CHANGE

The Strap Quick Change system allows you to effortlessly remove the helmet straps. With a simple clic you can now clean your straps after your daily ride, change them when worn out or easily replace them with optional colors for a unique custom look.

ADJUSTABLE NEW RETENTION SYSTEM

The all new R.S.R. Retention System has been fine tuned to enhance the fitting of our helmets. The retention system improve stability and performance while the wraparound structure, precise micrometric regulation and height adjustment provide a perfect personal fit.

RUDY PROJECT EYEWEAR AND HELMETS

COLOR MATCH

There is an intense relationship between the Rudy Project collections and their colour combinations; shapes, volumes, materials and perception in all of its senses have deeply inspired the creative team. Rudy Project's constant research into colour is evident in its winning choices and combinations, the reward for a decade's worth of experience and an unrivalled spirit of innovation. Here's a small selection of color matching products. Have fun creating other matching combinations while discovering our full collection!

RX OPTICAL

RX DIRECT

THE ULTIMATE OPTION

- the world's most advanced digital surface lenses
- fully personalised
- Maximum impact resistance
- Stylish wraparound design
- Superior eye comfort (absence of distortions)
- photochromic or polarized lenses

RX DIRECT CLIPS

THE UTILITY OPTION

- Easy to mount and interchangeable allows opticians to edge prescription lenses in the office
- Perfect for high prescriptions
- Ideal for contact lens wearers who want another option for when eyes become irritated
- High versatility of interchangeable clear and sun RX lenses in the same frame
- Adapts perfectly to different contexts

RX OPTICAL DOCK

THE HIGH CORRECTION SPORT OPTION

- Easy to mount and interchangeable
- Perfect for sport high prescriptions
- Available in our top selling performance models
- allows opticians to edge prescription lenses in the office
- full rim interchangeable design
- built to last

RX INSERTS

THE VALUE OPTION

- Easy to mount and interchangeable
- Perfect for lower budgets
- Allows opticians to edge prescription lenses in the office
- Available on all performance models
- Perfect for contact lens wearers

RX FLIP-UP

THE VERSATILE OPTION

- Perfect for high prescriptions and versatile sun protection
- Allows instant control over light transmission
- Designed for sport but ideal for any occasion
- Driving friendly
- Allows opticians to edge prescription lenses in the office

RX READERS

THE INTEGRATED READING OPTION

- Perfect for people with presbyopic correction needs
- Helps to read - maps, smart/mobile devices, hear rate monitors, score cards, etc..
- PC bifocal lenses available in 3 powers and 3 vibrant multilayer colours

RX OPHTHALMIC

THE PRESCRIPTION OPTION

- Inspired from our performance models features but with the casual touch
- Allows opticians to edge prescription lenses in the office

RX DIRECT / IMPACTRX

Offering freeform single vision and progressive lens design for performance sport wraps, ImpactRX® is the world's most advanced digital back surface lens program, fully personalized for your lifestyle. We've combined a revolutionary lens material with the best 8 base wrap design to create the best prescription sports lens in the world! Now available in 8 superlative platforms.

For more information please ask for the specific 'HiTech Prescription Solutions for Sport' catalog developed for opticians; contact your country official Rudy Project distributor (<http://www.rudyproject.com/customer-service/distributors/>) or send an email to rudyrx@rudyproject.com to receive your personal web credentials. Once activated you can immediately place orders.

RP OPTICS highindex

TECHNICAL FEATURES	
Density gr/cm3	1,23
Refractive index	1,60
Abbe Number	41
UV Cutout	400
Absorption	100% UVA UVB

OUR 1.6 ENTRY MATERIAL OF CHOICE FOR PATIENTS WITH HIGH PRESCRIPTIONS, OR WHEN LENS THICKNESS CONSIDERATION IS ESSENTIAL

Rudy Project created a new and innovative Hybrid material, dedicated to patients with stronger prescriptions: the ImpactRx High Index combines the best attributes of High Index, such as its extraordinary thinness, to the comfort of ImpactRX, offering strength and durability.

Main features include:

- LOWER DENSITY TO PROVIDE LIGHTER LENSES AND INCREASED COMFORT
- ENHANCED IMPACT RESISTANCE (UP TO 5 TIMES WHEN COMPARED TO OUR PREVIOUS HI-1.6 MATERIAL)
- IMPROVED COSMETIC FOR WRAP LENSES
- THINNER THAN COMMON HIGH INDEX 1.60 MATERIALS (UP TO 5%)

diamondcoat™

WHAT IS DIAMOND COAT?

Diamond Coat is an exceptional and powerful multi-layer coating engineered to eliminate lens glare, ghost images and halos from bright light or back reflections while offering a cleaner vision by preventing dust, water drops, scratches and finger marks on the lens. Perfect for outdoor action and dusty environments, Diamond Coat will keep lenses sparkling and easy to clean. It will ensure a better comfort while providing outstanding lens durability.

The Rudy Project Diamond Coat is a superior treatment resulting from extensive research and provides the following features:

- anti-static layer against dust and impurities

- anti-reflection coating, cutting lens glare, ghosts and halos resulting from bright light

- enhanced protection against finger marks

- superior hydrophobic layers against water drops

- outstanding scratch protection, ensuring lens durability

WHAT IS POLAR 3FX?

POLARIZED LENSES effectively block reflected glare, a situation which occurs primarily near water or snow or off reflective surfaces nearby, such as car windows, metallic objects, etc. Light which strikes a horizontal reflective surface is reflected back into your eyes. You then get a "double dose" of light energy, some of which falls directly on to you and some that is reflected on to you. Polarized lenses offer an interesting advantage: because they dramatically reduce or eliminate the reflected light energy which might account for the majority of the annoying glare, you can use a lighter tint to achieve the same (or better) degree of glare reduction and comfort compared to non-polarized dark lenses.

PATENTED 3FX POLARIZED TECHNOLOGY

POLAR3FX coatings offer:

- Advanced visual acuity, depth of field perception, chromatic partitioning.
- Minimizes annoying staining and smudging for clean, unobstructed vision all the time.
- Highly scratch resistant.
- A unique and sophisticated fashionable look.

diamondcoat™ INCLUDED

Rudy Project's unique multi-layer process provides excellent visual acuity and eliminates annoying back glare that causes eye strain and eye fatigue in bright light conditions. Reduced hue and ambient reflections.

ANTI-REFLECTION COATING

Lenses with higher indices also reflect more than standard plastic and glass. Because of this, anti-reflective coating is especially important. Additional reflections will be distracting in day to day activities such as night driving and computer use. Impurities, water drops, dust, scratches will heavily influence the comfort of high index lenses, for these reasons, Rudy Project offers diamond coat, our new premium coating.

ATTENTION

For its highly engineered vision solution using extremely sophisticated edging equipments, all models of the ImpactRX and ImpactRX High Index collection are mounted and shipped directly and exclusively through our own laboratories according to selected sunwear geometry and original patient's prescription formula.

NEW POLAR 3FX HDR

After years of intense research, we have updated our Polar3FX technology to take your vision to the next level. Polar3FX HDR technology eliminates glare providing superior visual comfort, enhanced contrast and contours. In addition, the new Polar3FX lenses incorporate the HDR (high dynamic range) filter to further define contrast and color perception. To ensure maximum toughness and durability, we have boosted the Polar 3FX lenses with the revolutionary 3FX Coating anti smudge and anti aging treatment.

IMPULSE

weight ounces: 1,0 grams: 27,5 (demo lens) temple - - □ 20 — 136

Mount any type of lens, without any limitation. Choose any material, any color, any treatment, almost any power, single vision or progressive. For our Impulse, Maya and Indyo frames the possibilities are limitless. Designed for sport but ideal for any occasion, the S.U.F. serve up a fashionable, functional and flexible eyewear option for individuals with vision correction needs.

TECH PILLS

- Nylon mount
- Clip base: 6
- Nylon groove milling: 0,8 mm x 0,8 mm
- We recommend spherical lenses
- Use Trivex, polycarbonate or high index 1.6 lenses

LENS MATERIAL	RECOMMENDED RANGE
index 1.53	- 3,00 + 2,00
index 1.60	- 4,50 + 3,50
index 1.67	- 5,00 + 4,00

The chart offers a general indication on the material of lenses to be used on prescription. The optician has the freedom to decide the final selection on the basis of the real requirements and prescription, fitting parameters (PD & H) and the shape of the lenses chosen.

8 BASE FITTING

- classic
- sport sunglasses geometry
- high wrap protection

IMPULSE: 6 BASE FITTING

- high prescription
- optimized performance
- base curve

RX DIRECT CLIPS

If your customer is a contact lens wearer with eyes easily irritated during sport practice, or because he does not have the budget for prescription sport sun lenses such as ImpactRX, Rudy Project has another option: our RX Direct Clips allow opticians to easily edging prescription lenses in office without the need of complex cutting machines. Thanks to a patented smart mounting system, they can be removed in a snap. This solution offers patients the versatility of interchangeable clear and sun RX lenses in the same frame.

OPTICAL DOCK

The evolution of the Rudy Project solutions dedicated sports eyewear continues with corrective lenses, with a now even more complete and articulated product range that's capable of meeting any technical and economic requirements. This is the pathway that led Rudy Project to develop the "Optical Dock": a full-rim Grilamid clip, available for the Rydon and Stratofly models, that allows for ophthalmic lenses made from any type of unbreakable material to be inserted. The Optical Dock is a veritable platform that's capable of ensuring the necessary lateral protection, while at the same time offering the possibility of mounting stock ophthalmic lenses thanks to the containment of the front wrap-around angle. And while the Rydon Optical Dock represents the ideal solution for even the most demanding sportsmen in terms of comfort and fit, the greatest new development is the version dedicated to the Stratofly version, the entry-level eyewear model from Rudy Project's Technical Performance family. As the perfect solution for those in search of the best possible balance between price and quality, the Stratofly model can be combined with the Optical Dock full-rim clip accessory in order to gain a better appreciation for the quality of Rudy Project products.

OPTICAL INSERTS

Rudy Project has created RX inserts that can be snapped in behind the polycarbonate Rudy Project lenses. Thanks to our patented 'easy-in easy-out' system, our Clip-ons can be inserted or removed with ease. This is particularly useful when you want to wear your contact lenses or when cleaning.

1. When the template is not available, use the demo (or plano lens) as reference to cut the ophthalmic lenses.
2. The clip must be properly shaped according to the model of the glasses which should be applied before installation. Once set, you can determine fit parameters (PD and H), and deduct final considerations when mounting progressive lenses.
3. Before removing the clip to fit ophthalmic lenses, remember to take your references for the true horizontal axis.
4. The vertex distance is reduced when using an Optical RX insert: this should be taken into consideration before mounting ophthalmic lenses.
5. The winding angle of the RX Optical Insert may change according to the design and geometry of the eyewear on which it is mounted, and it is always much higher than the one found on a regular dress eyewear. This induces an horizontal prismatic deviation which will increase with the power of the lenses. Rudy Project recommends, as a general rule, to apply an horizontal shift of the lens in this way: +1.00 mm per eye in case of negative correction / -1.00 mm per eye in case of positive correction
6. If the value of the spherical lens is more than +/- 3.00 diopters and given the high wrap of the Rudy Project frames, it is necessary to make the due considerations on the required horizontal prismatic compensation and to the reduced vertex distance.
7. Before mounting ophthalmic lenses, it is always recommended to check the centering of the lenses on the clip once housed in the frame; do not mount any prescription on a clip without frame.
8. For the best result when mounting lenses on the clip, Rudy Project suggests to refer to the regular dress eyewear of the patient: in this way the adaptation to the new device will be faster and easier.
9. Rudy Project recommends the fitting of ophthalmic lenses with spherical geometry. For best results, consider to mount lenses with optical design specific for wraparound frames.
10. The RX Insert is not compatible with ImpactX® Polarized lenses.

OPTICAL CLIP
SHOCK ABSORBER KIT
(INCLUDED) 6 pcs.
AC 56 00 33

The FR70 RX Optical Insert comes now standard with 3 pairs of proprietary shock absorber stickers; made out of a special polymer they will minimize scratches and vibrations resulting from the insert/correction lenses against the inner surface of the sun/plano lenses. To be mounted on the far edge of each prescription lens of the insert.

RYDON READERS

The all new Rydon Readers are sunglasses conceived for sportsmen who need slight corrections and no compromises in term of style and functionality. This sport reader prescription lens is seamlessly integrated in the lower part of the RP Optics sun lens to help you reading and looking through maps or devices screens such as mobile phone, gps, cycle-computers and heart monitors. The Rydon Readers mounts three configurations of prescription lenses such as the Smoke, or the Multilaser Ice and Multilaser Red lenses which enhance the protection from glare and increase your cosmetic appearance. Each lens color is available with three different correction powers + 1.5, + 2.0 and + 2.5.

WATER SPORTS

WATER SPORTS

ELEVATE YOUR PERFORMANCE

PROTECTION FROM WIND AND WATER

The Rudy project sunglasses boasts technical features to enhance your protection from the atmospheric elements such as wind or water. The Airgrip features easy removable comfort pads and peripheral shields to manage the protection from side light and wind.

HYDROPHOBIC TREATMENT

Our Polar 3FX lenses boast an hydrophobic coating which enable water slipping on the surface of the lens. The 3FX hydrophobic treatment does not allow the water drop to stick on the lens surface which remains clean and dry without smearing and streaking.

GLARE ELIMINATION

The Polar 3FX lenses are designed to meet the sailors demands. By eliminating glare, the Polar 3FX lenses delivers superior visual comfort for sailing, regattas or yachtsman. Better clarity and enhanced sharpness result in less eye fatigue and more enjoyable sailing experience

SHOOTING HUNTING

ELEVATE YOUR PERFORMANCE

RANIERO TESTA - IPSC World Champion

SHOOTING

FOCUS ON THE TARGET

Extraordinary field of view, enhanced contrast, protection from atmospheric elements such as sunrays, dust and insects. We have removed all the obstacles from your line of sight to improve your peripheral and vertical vision and cut out any optical interference.

FACE EVERY WEATHER CONDITION

Thanks to our proprietary ImpactX photochromic lenses every shooter can benefit from the unparalleled light management of the world most advanced photochromic lenses. They are unbreakable providing maximum protection for the eyes from any possible impact from shrapnel, flying shells and sparks, the main causes of damage to the eyes during target shooting.

ENHANCED CONTRAST

The ImpactX 2 Laser Red lenses featured in the shooting sunglasses boasts the HDR filter. By tuning specific wavelengths of light and by optimising the color spectrum, the HDR filter improves performance and visual vigilance - while offering comfortable color recognition. The end result is a sharper detail perception which is crucial for the shooters demands.

All the Rudy Project Stealth products are ANSI Z87.1 certified.

What is Z87.1

ANSI Z87.1 is the American National Standard that covers the basic requirements for personal eye and face protective devices to minimize or prevent injuries from impacts, non-ionizing radiation and chemical agents in occupational, educational and military environments. This Standard sets criteria related to the description, general requirements, testing, marking, selection, care and use of these protectors.

+ is an additional requirement of ANSI Z87.1 standard which provides more strict and severe impact tests:
Penetration (1.56 oz - 44.2 gm / 50 in - 127 cm) High Mass Impact (17.6 oz - 500 gr / 50 in - 127 cm)
High Velocity Impact resistance (150 ft/s - 46 m/s).
